Technological innovation and quality, conscious attention to detail as well as a holistic and systematic approach to hygiene and sterilisation are synonymous with the name Cominox.

Here we outline some of the most popular products:

£4800  
+ VAT

Our special price for the **Cominox B24** autoclave includes the **printer, sterilcard and wizard.**

With automatic programmable start, this cost effective purchase avoids extra labour and printing costs and additional test tools. Its hygiene programme provides automatic decontamination of all water lines and suction systems.

£3600  
+ VAT

Alternatively you will find the same features, but in lower capacity, in the **B Class 18 litre**. The cycle takes about 40 minutes.

£3200  
+ VAT

Why not have a look at the **SterilClave 6 B SPEEDY?** This is a compact steriliser suitable for smaller decontamination rooms but with an efficient square sterilization chamber and independent steam generator.

Best of all, the cycle only takes 9 minutes!

## Daylight Systems

A huge draw to our stand at the Dental Show was our **Medilux daylight lighting system.** It certainly put our competitors in the shadows!

This new concept in fluorescent lighting provides a high level of illumination but with low energy consumption (a saving of 30% on conventional starters). No flicker, no starting delay, no strobing, no intrusive noise.
